DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 6/24/05, and has been entered and made of record. Currently, claims 1-20 are pending.

Terminal Disclaimer

2. The terminal disclaimer filed on 6/24/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,584,290 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Ryan on 7/21/05.

The application has been amended as follows:

Regarding claim 10, the word "customer" located in the last line of limitation "(b)" is to be deleted.

Allowable Subject Matter

4. Claims 1-20 allowed.

5. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 10, 11, and 13, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to provide a printing machine with a replaceable component that contains an identification code that is electronically transferred to the printing machine and printing a document including information on at least one of recycling and installing the replaceable component.

The closest prior art, previously noted as Benjamin et al. (U.S. Patent No. 6113208) and Best et al. (U.S. Patent No. 6181885), each fail to disclose a document including information on at least one of recycling and installing a replaceable component of a printer in combination with the installation of a replaceable component in a printing machine that contains a memory storage device for storing an identification code of the replaceable component that can be electronically transferred to the printing device. Benjamin discloses a printing machine (see Fig. 1 and column 2 lines 54-55), installing a replaceable component in the printing machine, the replaceable component including

a memory storage device, the memory storage device containing data about the replaceable component (see column 3 lines 1-6 and 35-45 and column 4 lines 20-40), electronically transferring data about the replaceable component to the printing machine (see column 3 lines 7-49), and printing a document including data about the replaceable component (see column 4 lines 20-40). Benjamin does not disclose expressly the memory storage device containing data including an identification code of the replaceable component, electronically transferring the identification code of the replaceable component to the printing machine, and printing a document including at least the identification code of the replaceable component. Best discloses replaceable components provided with memory storage having identification units, the component being able to display data about the replaceable component (see column 2 lines 7-45, column 6 lines 59-65, and column 7 lines 30-64). Benjamin and Best do not disclose a printing machine with a replaceable component that contains an identification code that is electronically transferred to the printing machine and printing a document including information on at least one of recycling and installing the replaceable component.

Therefore, because of these reasons, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
